Don’t Miss the Sounds You Need To Hear

3M™ Littmann® Stethoscopes
A trusted leader in innovative auscultation technology, Littmann stethoscopes are renowned worldwide for unsurpassed quality. The Littmann brand name is your assurance of precision, acoustical superiority, innovative design and exceptional performance. 3M offers a wide variety of stethoscopes to meet your auscultation needs.

The family of 3M™ Littmann® Stethoscopes

A trusted leader in innovative auscultation technology, Littmann stethoscopes are renowned worldwide for unsurpassed quality. The Littmann brand name is your assurance of precision, acoustical superiority, innovative design and exceptional performance.

3M offers a wide variety of stethoscopes to meet your auscultation needs. We also offer Educational CDs that can help everyone improve their auscultation skills.

As a professional who requires the finest in precision instrumentation, invest in the performance that Littmann stethoscopes provide.
Littmann Ambient Noise Reduction (ANR) Technology

Helps you find clarity amid cacophony.

Until now, the advantages of amplification in an electronic stethoscope have been negated by the sensitivity of electronic stethoscopes to distracting sounds from ambient room noise.

Examples of ambient noise include:

- Human voices and movement
- Medical equipment (respirators, heart/lung machines, heart monitors)
- Other environmental sounds

But thanks to a proprietary technological advancement known as Ambient Noise Reduction (ANR), 3M Littmann Electronic Stethoscopes Model 4100WS and Model 3000 reduces distracting room noise by an average of 75% (–12dB) without eliminating critical body sounds.

So you’re much less likely to miss the sounds you need to hear.

How ANR works.

Ambient noise isn’t just in the air; it also travels through the patient’s body. The key to reducing ambient noise is to address both pathways. And ANR does just that without filtering away important sounds. Noise from the room enters the stethoscope through a thin gap in the chestpiece and, once inside, meets noise that enters through the body. The two cancel each other out, leaving the heart, lung and other body sounds you want to hear.
ANR technology acoustically cancels out an average of 75% of distracting room noise. This acoustic canceling effect is different than electronic filtering, which may also filter out some portions of body sounds.

Littmann Tunable Technology

Littmann tunable diaphragm technology offers enhanced acoustics, versatility and time-saving convenience.

Switching between bell and diaphragm modes is as easy as a simple pressure change on the chestpiece. There is no longer a need to remove, index and replace for same-site auscultation.

Bell Mode
(low-frequency)
Light contact with chestpiece allows you to hear low-frequency sounds.

Diaphragm Mode
(high-frequency)
Without turning the chestpiece over, use firm pressure to hear high-frequency sounds.
3M™ Littmann® Electronic Stethoscope Model 4100WS with Ambient Noise Reduction (ANR)

- Amplification is up to 18 times greater than the best non-electronic stethoscopes
- Ambient Noise Reduction technology acoustically cancels out an average of 75% of distracting room noise*
- 3M™ Littmann® Sound Analysis Software lets you see exactly what you’re hearing, on your Windows based PC or Pocket PC
- Digital recording and storage of sounds on six distinct tracks
- Recording and playback capability at normal and half-speed
- Permits infrared transmission of digital recordings to another Model 4100 or 4000, or Windows based PC or hand-held device
- LCD display in chestpiece, including heart rate readout
- Twenty hours of continuous use from two AAA alkaline batteries
- Patented 3M™ Littmann® Snap Tight Soft-Sealing Eartips create an excellent acoustic seal and comfortable fit (available in two sizes)
- Comfortably angled, anatomically correct headset
- Patient-friendly, nonchill rim
- Chestpiece sized for adult or pediatric patients

* see page 4 for details
The Littmann Electronic Stethoscope Model 4100 features amplification and proprietary Ambient Noise Reduction (ANR) technology. Digital signal processing offers recording, storage, and playback capabilities. And when combined with the 3M™ Sound Analysis Software you have an exquisite, state-of-the-art auscultation system, which allows you to see what you are hearing via visual display of a phonocardiogram. This hardware and software combination will enhance teaching opportunities, serve as a diagnostic aid and help you make more effective use of telemedicine.

Filter circuitry provides three frequency response modes for optimal heart and lung auscultation:

- Bell (20–200 Hz)
- Diaphragm (100–500 Hz)
- Extended Range (20–1000 Hz)

3M™ Littmann®
Electronic Stethoscope Model 3000
with Ambient Noise Reduction (ANR)

- Amplification is up to 18 times greater than the best non-electronic stethoscopes
- Ambient Noise Reduction (ANR) technology acoustically cancels out an average of 75% of distracting room noise*
- Patent-pending low friction diaphragm surface
- Programmable volume settings
- Ergonomic, one-button control allows you to adjust volume and frequency mode with one finger
- Automatic power shut down after 3 minutes from last button activation
- Traditional cardiology tube set allows scope to easily fold and be placed in pocket
- Ergonomically designed chestpiece for easy, one-hand manipulation
- Patented 3M™ Littmann® Snap Tight Soft-Sealing Eartips create an excellent acoustic seal and comfortable fit (available in two sizes)
- Single AAA alkaline battery provides up to 200 hours (approximately 6 months) of use (Sound quality remains within specification after auditory low battery warning)
- Nonchill diaphragm for patient comfort
- Versatile chestpiece can accommodate infant, pediatric or adult patients

* see page 4 for details
One look at the chestpiece and you will immediately recognize that this is not just another stethoscope. The Littmann Electronic Stethoscope Model 3000 offers one-button, one-finger control of both volume and frequency mode. In addition, it features Ambient Noise Reduction Technology that cancels out distracting room noise and helps you hear more of the sounds you need to hear.

3M™ Littmann®
Master Cardiology™ Stethoscope

- Tunable diaphragm conveniently alternates between low- and high-frequency sounds without the need to turn over the chestpiece*
- Handcrafted solid stainless steel chestpiece
- Dual-lumen design eliminates tube rubbing noise
- Portable convenience of a single-sided chestpiece
- Patented 3M™ Littmann® Snap Tight Soft-Sealing Eartips create an excellent acoustic seal and comfortable fit (available in two sizes)
- Special- procedures adaptor for difficult site or pediatric auscultation
- Comfortable angled, anatomically correct headset
- Patient-friendly, nonchill rim and diaphragm

* see page 5 for details
A tunable diaphragm and superb craftsmanship offer the ultimate performance in a superior stethoscope. The 3M™ Littmann® Master Cardiology™ stethoscope meets the exacting standards of healthcare professionals who demand very high acoustic response.

3M™ Littmann®
Cardiology III Stethoscope

- Two tunable diaphragms conveniently alternate between low- and high-frequency sounds without the need to turn over the chestpiece*
- Solid stainless steel chestpiece
- Dual-lumen design eliminates tube rubbing noise
- Patented 3M™ Littmann® Snap Tight Soft-Sealing Eartips create an excellent acoustic seal and comfortable fit (available in two sizes)
- Comfortable angled, anatomically correct headset
- Patient-friendly, nonchill rim and diaphragm

* see page 5 for details

The pediatric side easily converts to a traditional bell with the provided nonchill sleeve
Outstanding acoustic performance and exceptional versatility characterize the Littmann Cardiology III stethoscope. The innovative design offers a tunable diaphragm on each side of the chestpiece. The large side can be used for adult patients, while the small side is especially useful for pediatric or thin patients, around bandages, and carotid assessment.

3M™ Littmann®
Lightweight II S.E. Stethoscope

- Chestpiece shape designed for better orientation around blood-pressure cuffs and body contours
- Traditional bell combined with a tunable diaphragm that conveniently alternates between low- and high-frequency sounds without the need to turn over the chestpiece*
- Patented 3M™ Littmann® Snap Tight Soft-Sealing Eartips create an excellent acoustic seal and comfortable fit
- Comfortable angled, anatomically correct headset
- Metal/resin composite chestpiece

* see page 5 for details
A general-purpose stethoscope with an improved design that provides reliable acoustics for basic blood-pressure and limited physical assessment.

Service and Refurbishment

When you purchase a 3M™ Littmann® Stethoscope, you are investing in a quality instrument that should last for many years. Beyond excellent product warranties, 3M offers service and refurbishment that is unmatched in the industry.

• Free repair and service for Littmann stethoscopes while under warranty

• Fee based refurbishment and cleaning services also available for Littmann stethoscopes no longer under warranty

• Prompt service (48 hours plus return transit time) upon receipt of your stethoscope, with free return shipping

Contact the 3M Health Care Service Center by phone at 1-800-292-6298, fax 1-800-770-8016 or visit www.littmann.com/service-repair/1 for more information. Outside the U.S., please contact your local 3M subsidiary.

The Littmann stethoscopes listed do not contain natural rubber latex or dry natural rubber as components in the product or packaging.
